The Case Study

Introduction

If you are young and talented and looking for opportunities TidyRAFT is the answer for you. TidyRAFT is something where you can put your projects and all the people in the world can view and edit your project. Not only they can but you can also view and edit anyone's project in the world. Project can be any file like html, css, javascript, python, c++ and almost every other programming language. This way you can interact with the whole world.

Now what makes us unique is that our

website is very basic and simple. For other websites like GitHub and many more you need to learn languages like gitbash, Use hard softwares like Git, Gitdesktop and many more. But our website is so easy to handle that even a 13 year old kid handle it. TidyRAFT can help you even learn languages.

Idea

You will have a limit of uploading one project per month. The price would be free. You can edit and view anyone's project and make it a copyright.
If you join our premium plan you can upload unlimited projects online at our website. You will even be able to see how many people and who have viewed your file. The premium subscription is just 25$ per month. Just by paying 15$ extra your project will be on priority and approx 10K-1M will see you project in just 1 week guaranteed.
Benefits of Premium Subscription-

=> Unlimited amount of projects can be uploaded

=> Price is very less

=> More and more people will see your projects

=> You can make a copyright of anyone's project

=> You can learn different programming languages

=> Our costumer care service will always be there to help you

=> And much more……

Other Features

There are many other features which you can go and check on our website www.TidyRAFT.com

Soon we will be launching our mobile app on App Store and play store. You can go and check out that too.

Our costumer care service is online 24 hours and can help you with anything just ask.
